Development Learning Network at SES

The development of the Mongolian Development Learning Network (MDLN), at the school of Economic Studies, National University of Mongolia is a tool to develop knowledge and information sharing activities with domestic and foreign universities and improve teaching methods and quality of the services.

Why SES needs GDLN site

The SES is a only school at the national level which has a set of professional departments which are able to provide teaching in numerous different kinds of classes at the high level of quality.

We have

- Ongoing local content, programs
- Appropriate school infrastructure
- Good educators and researchers

We need

- Deliver local content to national level
- International programs make SES in strong need of video conference, meeting and seminars.
- At the same time traditional methods of the classroom learning no longer satisfy students and professionals need, who is working and studying same time.
- Sharing international knowledge

What is needed for GDLN site

- Strong partnership with clients, donors
- Strong government commitment and support
- Professional management
- Business approach

What can it deliver

- Seminar and video conference on the topic of economics, marketing, international trade, and international finance, management among professors, lecturers, professionals, decision makers, and students.
- Knowledge and skills on effective use of MDLN
- Online international training programs
- Video conferences between SES and other universities (Harvard Business School, NCC education Co., Ltd ...).
- more cooperation between SES and universities and students around the world by delivering seminars, training events, and meetings, videoconferences and web based activities.
